

New Lenox Ordnance Powder Breech Systems

- * More economical way of launching projectiles
- * Does not use a conventional cartridge case
- * Has wider ranges of velocities than Universal Receivers
- * Projectiles are loaded into the bore of the barrel resulting in less yaw and better control of velocity
- * Uses a .308 or 30-06 cartridge case to ignite the main charge
- * We are able to supply both rifled and smooth bore barrels up to 12' long
- * Our 30mm Smooth Bore Systems are capable of launching a 20mm FSP at OVER 5000 feet per second
- * Manufactured from high quality ordnance steel
- * Our complete systems consist of the barrel, breech, mount, and remote firing system
- * Sizes available from .50 Caliber to 50mm
- * Our complete small system weighs approx. 1000 lbs.
- * Our complete large system weighs approx. 2000 lbs.
- * System lengths range between 12-15 feet
- * We can supply a complete turn key system to fit your needs
